

What I have done each week during this milestone:

- Week 1 and 2: Creation of the fifty extra questions (Heaps subject and hashing subject).
- Week 3: Creation of three dynamic exercise about Hamiltonian path subject (one drag and drop, one multiple choice and one True or False).
- Week 4: Standardized feedback messages, reviewed all exercises to ensure everything is functional and complies with standard rules and adding highlighted graphics inside feedback to show the correct answer when the question need to have a comprehensive answer.
