

# Diary - Final

1.11 - 7.11

I fixed my dynamic question, where the student has to find out how many hamiltonian cycles are in a given graph and the 0 solutions weren't shown correctly.

Then I changed my questions that included code to not have a toggle code button anymore, as the questions were about the code.

I added a drop down question where the user has to select the correct code snippets for the function for finding Hamiltonian cycles.
